Theme : Usage of MongoDB

Creating a Database using MongoDB and Mongosh

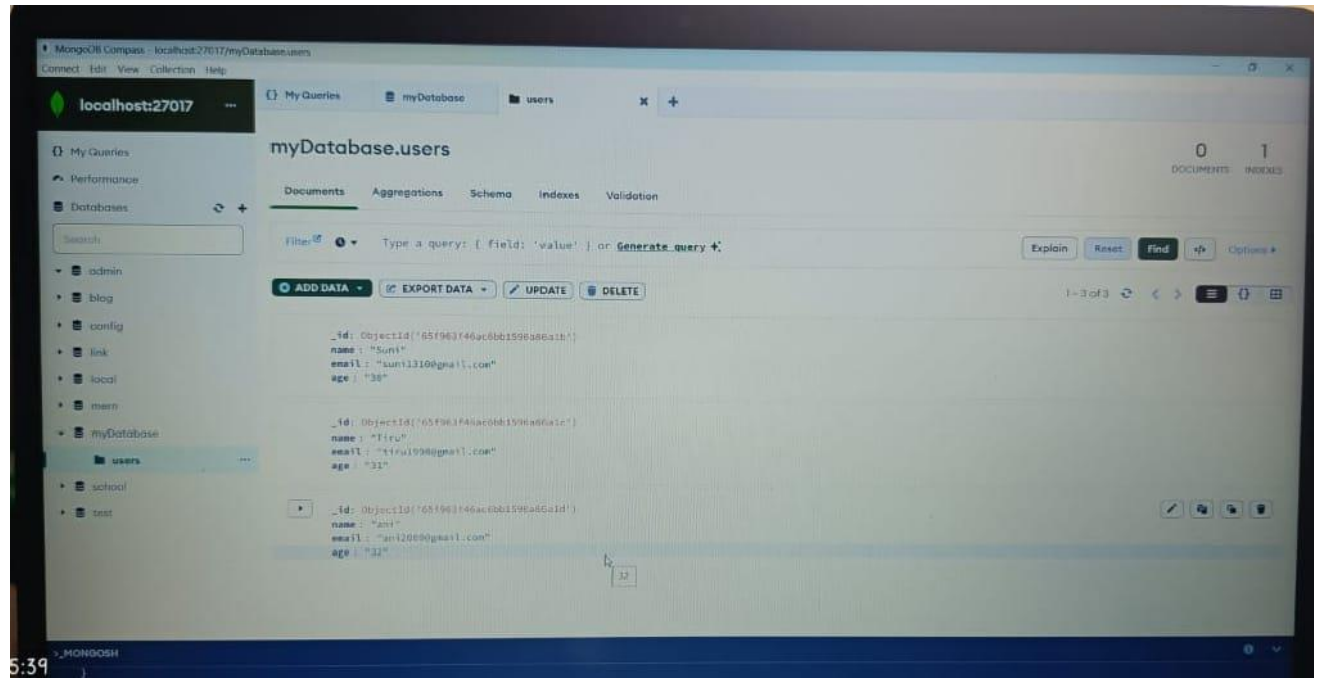

The screenshot displays the MongoDB Compass interface and a terminal window running the Mongosh shell. The Compass window shows the 'myDatabase.users' collection. The terminal window shows the following commands and their outputs:

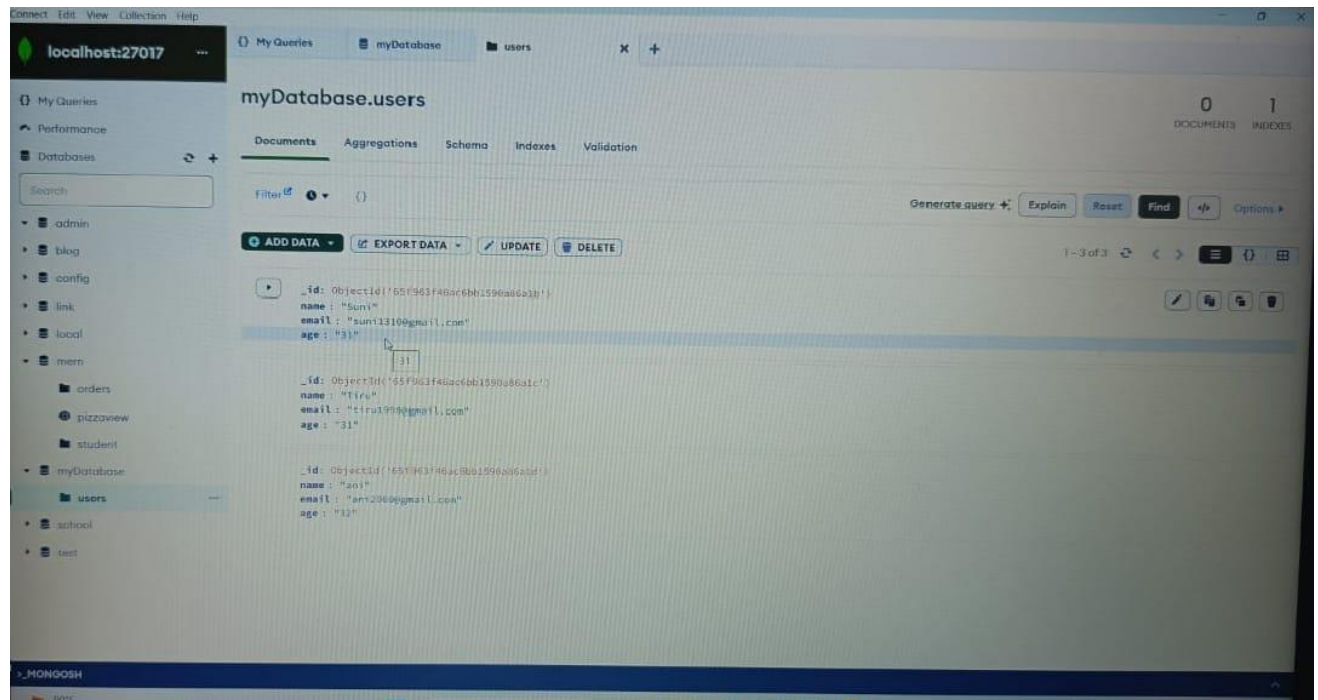

```
> MONGOSH
> use myDatabase
< switched to db myDatabase
> db.createCollection('users')
< { ok: 1 }
> db.users.insertMany([{'name':'Suni','email':'suni131@gmail.com','age':'30'}, {'name':'Tiru','email':'tiru1998@gmail.com','age':'31'}, {'name':'ani','email':'ani2000@gmail.com','age':'32'}])
< {
  acknowledged: true,
  insertedIds: {
    '0': ObjectId('65f963f46ac6bb1598a86a1b'),
    '1': ObjectId('65f963f46ac6bb1598a86a1c'),
    '2': ObjectId('65f963f46ac6bb1598a86a1d')
  }
}
> db.users.updateOne({'email':'suni131@gmail.com'}, {$set:{'age':'31'}})
< {
  acknowledged: true,
  insertedId: null,
  matchedCount: 1,
  modifiedCount: 1,
  upsertedCount: 0
}
> db.users.deleteOne({'email':'ani2000@gmail.com'})
< {
  acknowledged: true,
  deletedCount: 1
}
myDatabase >
```

The terminal window also shows the system tray at the bottom with the date and time: 15:54 19-03-2024.
